

Geography in our community

- Year 1 learn about our local area and local landmarks
- Year 6 explore local rivers and coastlines

Geography at Pike Fold

We have a cross-curricular approach in which Geography plays a vital role with links through many other subjects. For example, in Year 2 they learn about the Great Fire of London and this links into their Geography focus on UK cities.

GEOGRAPHY

Celebrating Geography through enrichment

Pupils at Pike Fold are incredibly lucky and take part in a range of activities and visits linked to their Geography curriculum including urban scape visits, forest schools and mountaineering. We also welcome visitors into school to discuss their experiences and share their knowledge.

What our pupils say

"Learning about Volcanoes was fun!"

"We learnt about continents in year 1 and it helped me when learning about Europe and Russia this year"
